JLG Telehandler

JLG Telehandler Training Ontario - Following retirement in the late 1960's, John L. Grove started out on a cross country RV trip. After spending many years establishing his family built crane company with his brother, John had no idea that this trip would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling technologies was the end consequence of a road trip.

All through their trip, John reacquainted himself with past business connections along the way. In combination with these conversations and a noteworthy event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a substantial marketplace for a product that could promptly and safely lift people in the air to accomplish maintenance and other building functions.

Upon returning from their travels, John established a partnership with two friends and purchased a metal fabricating company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty employees, they manufactured and sold the first JLG aerial work platform. The company incorporates some of the basic design essentials of that original lift into current models.

JLG forklifts have come a ways from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. These days, the business proudly continues to expand itself into different markets worldwide and develops new products to ensure consumers are capable of being more effective and perform in the workplace within a safer atmosphere.
