Ontario Boom Lift Training

Ontario Boom Lift Training - Aerial platforms or elevated work platforms are devices that allow workers to carry out duties and tasks at elevated heights which would not be otherwise accessible. There are various aerial lifts available to carry out different applications under various site conditions. If not carefully operated, elevated work platforms could cause fatality or serious injury. The most common reasons for related accidents are falls, electrocution, crushed body parts and tip-overs. Lift operators should be trained completely in procedures to avoid accidents while operating lifts.

Aerial Lift Safety program is designed for those who have to operate the devices more safely and effectively. The course provides thorough instruction about the most utilized lifting devices within the business.. Kinds of lift covered comprise scissor, articulating and boom supported aerial lifts. The video presents the right procedures operators should follow. Instruction focuses on protection against falls, pre-operational inspection, safe driving procedure and stability of the device.

The boom lift training program will help to address employee safety and equipment reliability, using materials which are completely compliant with your local and regional regulations and requirements. Course management and training techniques would be taught. The trainer would also become well versed in the technical aspects of aerial lift safety.

Both classroom training and practical training are parts of the Aerial Platform/Boom Truck Training course. Both sessions should be successfully completed for the participant to be given a certificate of achievement.

The difference between self-propelled elevating work platforms and self-propelled boom-supported elevating work platforms is that, on the latter type, work platforms could be positioned totally beyond the base of the equipment. The theoretical training part is virtually the same for both kinds. The practical component of the training can be completed sooner if only one kind of machine is used.

Elevating Work Platform Training Program Objectives:

For the safe operation of Boom-Type Elevating Work Platforms and Self-Propelled Elevating Work Platforms, boom lift training would help operators use their machines more efficiently and will lessen the chances of accidents in the workplace. Trainees will review of applicable regulations and business polices, talk about Due Diligence, study Criminal Negligence and consequences to employers, trainers, supervisors and employees. Participants will study equipment features, stability, operating procedures, parking and fueling/charging procedures. Site-specific safety concerns will be dealt with.
