Ontario Counterbalance Forklift Training

Ontario Counterbalance Forklift Training - Demand is always high for our popular Counterbalance Forklift Truck Training courses. A Counterbalance forklift refers to a forklift together with a weight which counters the balance, allowing the weight of the load to be spread evenly across the forklift arms. Counterbalance forklifts are made so the weight behind the center of gravity is counterbalanced by the weight on the lift. The load is projected out from the front of the equipment so it is visible to the operator of the forklift. This particular kind of forklift truck should only be used on stable, level ground or on a prepared surface.

Forklift operators are required to obtain training that would allow them to better understand the proper or right method across the arms of the forklift. The trainee will learn to properly raise and lower the load vertically and how to tilt the lift truck mast, moving the mast between 5 and 15 degrees both forwards and backwards. Trainees would know the RTITB standards required for safely operating the forklift. Individuals training would also become familiar with the types of attachments for the forklift arms.

Types of Counterbalance Forklifts:

Walkie Pallet Trucks
The counterbalance forklift referred to as the Walkie Pallet Truck is best suited for getting into spaces which are both cramped and small. This lift is highly maneuverable and can access almost whichever tight spot.

Walkie Stackers
The Walkie Stacker is another forklift that varies a little form the Walkie Pallet truck when it comes to its lift height. This particular equipment is designed to access tighter areas and has extra lift capabilities for high stacking. Neither of the Walkie line of lifts could be ridden. The driver has to walk behind them.

Rider Pallet Trucks
The Rider Pallet Truck is made so the operator could ride it. These riding lifts are perfect for dock loading and unloading.

Wave Work Assist Vehicle
The counterbalance forklift referred to as the Wave Work Assist Vehicle could reach heights as much as 17 feet.

Sit Down Counter Balanced Trucks
The Sit-down Counterbalance Forklift is made in three-wheel and four-wheel forklift designs. These durable and tough trucks are designed to be ridden.
