Ontario Manlift Ticket

Ontario Manlift Ticket - The Elevated Platforms and Manlifts Certification course helps to provide the necessary training on the work practices, safe operating procedures, rules and regulations regarding the daily activities for the operators of this machinery. The program has been designed for people who are actively involved in these activities or individuals who have a basic understanding of this machine.

In the past couple of decades, aerial platforms and manlifts have become a common sight in industrial maintenance applications and on construction job sites. These equipment provide an easy way to lift workers near what must be carried out on a stable platform apparatus, allowing employees to carry out tasks with greater comfort and safety rather than being perched on top of ladders or scaffoldings.

Like every other tool, manlifts are only safe if they are utilized correctly. As they lift staff above ground level or floor, accidents could easily happen and this may cause serious death or injuries for both the manlift operators and any passerby who might be unlucky enough to be standing underneath.

There are a variety of models of manlifts. Most fall into 1 of 2 categories: the articulating boom lift, that has the capability of both horizontal and vertical movement and the scissors lift, that is capable of moving upward and downward.
